

Name : Khushal Agarwal

Section : A

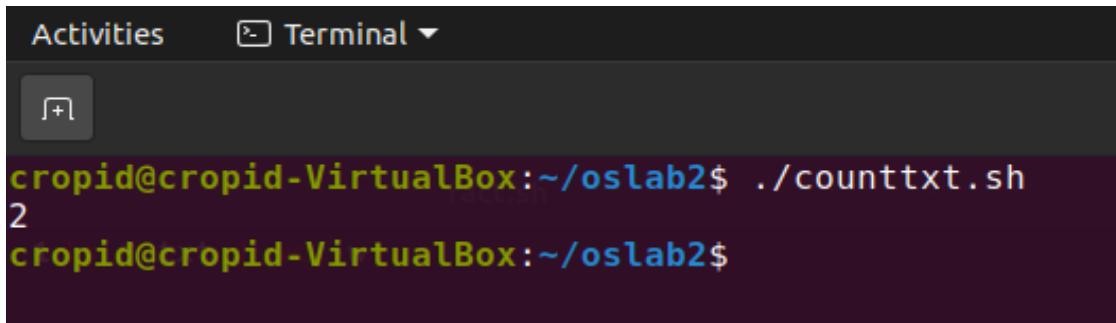

RollNo. : 30

Experiment – 23

AIM : Write a short script count txt to count the total number of .txt files in the current directory, and print out this number to screen.

ShellScript :

`ls *.txt | wc -w`

A screenshot of a terminal window titled "Terminal" with a dropdown arrow. The terminal shows a prompt "cropid@cropid-VirtualBox:~/oslab2\$" followed by the command "./counttxt.sh". The output of the script is "2", which is printed on the line immediately following the command. The prompt "cropid@cropid-VirtualBox:~/oslab2\$" is shown again on the next line.

```
Activities  Terminal ▾  
cropid@cropid-VirtualBox:~/oslab2$ ./counttxt.sh  
2  
cropid@cropid-VirtualBox:~/oslab2$
```
